JAS. W. HICKOK.

Burlington, March 1, 1833.

Hickok's Patent Rotary Oven COOK STOVE.

THE subscriber has just received and offers for sale, a few stoves, of which the above is a representation. To all the advantages of the improved Rotary top, is added a Rotary Oven on an entirely new plan, which, from the testimony of those who have used them, far surpasses any thing of the kind, yet offered to the public. Those wishing to purchase cook stoves are respectfully requested to examine these before making their selection, as ocular demonstration will better convince the public of the value of the article than any description that could be given. Another recommendation, these have times, that their stoves will be sold as low as the common Rotaries of the same size.

MORISON'S PILLS.

WE present this medicine with the fullest confidence to the consideration of the sick and discouraged invalids, and urge you to take them, we are as believing in their efficacy as any one possibly could be; but there has been too many cases of cures in the town of Burlington alone, to permit us to doubt their good qualities. We know of persons cured of what the Faculty pronounced to be incurable, confirmed Consumption; some of various kinds of fevers, and some of these cases given up as past cure, before the Morison's Pills were administered. We can send you to persons where two were taken down with fever, one was put under the care of a Physician, and the other was put under the operation of Morison's Pills; this one was up and well in a few days and the other was cured by the Physician. It was then put under the operation of Morison's Pills, and is now (Feb. 17th) doing well. We can show you a person, who returned from the West very sick with the fever and ague, he was after much persuasion induced to take this medicine and was shortly well; it is then given to his brother and father, who are both well. This is the medicine which does not weaken when taken every day, week after week, but on the contrary, as thousands upon thousands do testify, it strengthens, enlivens, and builds up the system. Hardly a day passes but what there are some cases or cures of cures reported to us, effected by this, first and best Vegetable Medicine ever invented. The public will please bear in mind that, until this had obtained an established reputation no other Vegetable Medicine would be heard of, but now they are springing up like mushrooms, evidently imitating Morison's, but they succeed badly, they cannot make them like him, and they do not have the great and beneficial operation, which Morison's do. The calls for this medicine continue to increase every where and the cases of cures are multiplying daily. For the leading principles of the Hygeian or Morisonian Theory of disease &c. see Burlington papers, of February 1833. EVERY BOX AND PACKET sold in Vermont is signed by Pangborn & Brinsmaid, State Agents; appointed by Geo. Taylor, 13 Chamber st., New York, member of the British College of Health, and sole Hygeian delegate to the United States sent out by said College in place of H. Shepard and Mead, removed. They will also be signed by the sub-agents appointed by us in their respective towns. NO OTHERS CAN BE GENUINE.

TO THE PUBLIC.

O. H. SEXTON, Surgeon Dentist,

RESPECTFULLY returns his thanks for the liberal patronage he has received for thirteen years past—the whole of which time I have been employed in Dentistry and have spared no pains or expense to qualify myself for the business. I am willing to warrant my work to be done skillfully, and as I intend to remain in town and continue my practice I shall be ready and willing to make any reasonable repairs of my work gratis. After ten years practice I went to Philadelphia and spent the summer in practice with Doct. S. S. Pritch, one of the most scientific and celebrated practitioners in Dental Surgery in the United States, where I paid five hundred dollars for tuition, besides other expenses and received a Diploma, authorizing and recommending me to practice Dental Surgery in its various branches in any part of the United States. I can assure the public that there is no business that requires more practice to make perfect than Dentistry, and if they would realize, as those who have experienced, the great injury done by bad practice in Dentistry they would guard against employing impostors. I am sorry to be under the disagreeable necessity of speaking publicly of a young man by the name of John Lewis, who advertises the practice of Dentistry in this place, but as he has travelled out of his path and made an unwarrantable use of my name to give himself currency in the Dental business, justice to the public as well as myself requires that I should state some facts in relation to Mr. Lewis and his qualifications, or rather want of qualifications. Mr. Lewis entered my office last May, under a contract to work for me for the space of two years at the Whitesmith business and making and repairing Mineral instruments, and the Mechanical part of Dentistry. He left my employ unceremoniously in January last about three fourths of the eight months time he was with me he worked at Organs, occasionally assisting me in the chemical operations of Manufacturing porcelain teeth. I never entered into any understanding with Mr. Lewis to learn him Dentistry, and during the time he was with me, I never directed or permitted him to perform any operations in Dentistry, except the mere mechanical part of Manufacturing the Materials for my operations; and I am not aware of his ever practicing Dentistry, or that he ever intended to practice, until I saw his advertisement. I had Manufactured teeth and materials before Mr. Lewis came to work for me, and continue to Manufacture them and am prepared to instruct others how to manufacture them, as well as can be done in the United States, but the art cannot be acquired in a few weeks, or even a few months. At the time when Mr. Lewis came to me in the Mechanical part of Dentistry he acquired from me in the manner above stated.

I have been thus particular in detailing the history of Mr. Lewis' education in Surgery, Dentistry, in order to caution the public against believing every Quack's advertisement. It requires no logic to convince sensible people that it does not follow of course that the Whitesmith who manufactures the Surgeon's Instruments, knows how, when and where to use them as skillfully as the surgeon himself.

Burlington, Feb. 20, 1833.

DENTISTRY.

J. LEWIS
WOULD respectfully inform the public that he is now ready to practice in the above business. From a perfect knowledge and practice of the business he feels willing to affirm that it will be done in the nearest manner.

Calls will be strictly attended to at their respective dwellings, or at his room at J. Potters, College Street, Burlington, Feb. 18, 1833.

THE HYGEIAN THEORY OF DISEASES.

AND GENERAL DIRECTIONS FOR THE USE OF MORISON'S UNIVERSAL MEDICINES.

Of the British College of Health, London

The leading Principles of the Hygeian or Morisonian Theory of Diseases are contained in the following Propositions;

1. The vital principle is contained in the blood.

2. Every thing in the body is derived from the blood.

3. All diseases arise from the impurity in the blood.

From the blood all the solids are derived and nourished—all the other fluids are secreted—and all the substances appropriated to repair the injuries done to the body are supplied. The rudiment of the future heart (and the circulating system) is well known, precedes the formation of other parts of the body and is visible for some time before any trace of the brain can be distinguished.

A the blood is the builder up of the body and source of general health, so it is also of universal disease; that being fluid while circulating in the body, it is more uniform in its appearance than any of the solid parts, which accounts for the difficulty of detecting any foreign or morbid matter which may be circulating with it. The miasm of fever are harmless to every other part of the system, and only become mischievous when they reach the blood. If the blood becomes once impregnated with a peculiar taint, it is wonderful to remark the tenacity with which it retains it, though often in a state of inactivity for years, or even generations. Hence all hereditary diseases, consumptions, &c.

Every germ and fibre of every other part, being formed and fed from the blood and all communication to the solids being cut off, except by the circulation, where else can we look to, as the seat of such taints or predispositions for disease, or for the cause of disease itself?

4. Pain and disease have the same origin and may therefore be considered synonymous terms.

5. Purgation by vegetables is the only effectual mode of purifying the blood, and eradicating disease.

It is evident that all those medicines which require preparation in the patient, and give cold if taken in damp or cold

weather, such as calomel &c; do not assimilate to the body, and are therefore highly injurious to the constitution, and impress and stamp new qualities upon it. For the "Vegetable Universal Medicine" it is unnecessary to prepare. They may be taken with advantage in any weather, or at any time of the year.

The simple theory—simple because true—contained in these five propositions was first promulgated by Mr. Morison, the Hygeist, in 1835; and his world-renowned medicines were taken with unparalleled success. Since that time numerous imitators have arisen in America as well as in Europe, who style themselves Hygeists, and pretend to treat diseases on Hygeian principles, and with "Universal Vegetable Medicines."

The Medicines of the British College of Health cure all diseases which admit of cure.

1. They remove from the stomach, liver and intestines—the blood-making organs—all obstructions to the due performance of their healthy functions.

2. They purify the blood, by increasing its various excretions; and prevent disease by enabling the body successfully to resist the predisposing exciting causes of disease.

3. They increase the action of the absorbents, by which all morbid growths are taken into the circulation and afterwards expelled from the body.

4. They restore the regularity of those processes upon which the formation and circulation of the blood depend.

These are the only medicines known in which small doses have a powerful and beneficial effect; and yet, of which, in extreme cases, such very large doses may be administered fearlessly and with greatly increased advantage to the patient.

5. None genuine unless signed by PANGBORN & BRINSMAID, State Agents.

Feb. 9.

NOTICE

TO RHEUMATIC INVALIDS
PERSONS suffering under Rheumatic Affections are respectfully assured, that they can obtain of the proprietor and his agents a safe and admirable remedy for RHEUMATISM, however obstinate the disorder may be, and in all its different stages.

DR JEB'S
Rheumatic Liniment!

will afford immediate relief to the patient, and has sometimes been attended with such extraordinary success as to cure the most distressing Rheumatism in twenty-four hours, even when of years standing.

This highly valuable Liniment is recommended with a confidence founded on the experience of many years, not only as a cure for that excruciating disease, but as an excellent application for STIFFNESS OF THE JOINTS, NUMBNESS, SPRAINS, CHILBLAINS, &c.

Among a mass of testimony in favour of the success of the Liniment, as a thorough remedy for RHEUMATISM, the proprietor selects the following as presenting genuine instances of its efficacy.

Now and surprising cases.

1. A gentleman, Mr. R. of Charlestown [who can be referred to] had been confined to his bed most of the time for a week, suffering most excruciating pain from Rheumatism; after having had recourse to the round of antidotes usually resorted to in this complaint, but without benefit; and while in this state of suffering, and no prospect of relief, Mr. Caleb Symmes, who was his neighbor, and who, having the extraordinary benefit he had himself experienced from its use, recommended the article with such confidence as induced Mr. R. to make use of it, which he did, with the usual success attending its administration, viz: immediate mitigation of pain relief and cure!

2. Mr. T. of this city, was attacked with a very violent Rheumatism in his back, which an application of this Liniment (on going to bed) instantly relieved, and cured by morning—observes he never used anything which gave him so much and so great relief.

3. An old Revolutionary Officer near Boston, was sorely afflicted for years with rheumatic complaints, especially in his joints and limbs, which were frequently much swollen, could obtain only temporary relief from medical advice, or the use of various remedies, and had despaired of help; when a friend who had witnessed the wonderful effects of this Liniment, advised him to make use of it, which he did, with the most happy effect; it reduced the swelling in one night.

This article is considered as superior to every thing else, and is pointed out by numerous writers, that it is ordered from distant parts of the country.

4. An agent recently writes: "Please send me a further supply of Jeb's Liniment the first opportunity—I shall probably sell a considerable quantity, as it is recommended by some of our physicians very highly."

5. Another agent writes: "I wish you to forward me some more of Jeb's Liniment, which has recommended itself very highly."

Price 50 cents a bottle.

THE PAINFUL AND DEBILITATING Complaint of THE PILLS

receives immediate relief, and in numerous instances has been thoroughly cured, by the administration of

DR JEB'S REMEDY FOR THE PILLS.

THIS approved compound also mitigates and removes the symptoms which frequently accompany that disorder, and increase the danger of the patient, viz: pains in Loins—Headache—loss of appetite—Indigestion, and other marks of debility.

A relieved Patient writes from a distance, "It is but justice to you to inform you, that I have used your Dr. JEB's remedy for the Pills for some time past, and have found it eminently successful."

As Officer in the Army observes—"I have been troubled for years with the Pills, and have never found any remedy that would compare with yours. It gave me almost immediate relief."

A Physician and Druggist writes, "I have sold all the medicine you sent me, which is so highly recommended for the Pills. I wish you to send me one dozen more by the bearer."

The remedy is quite innocent, and may be administered to all ages and both sexes—Plain and ample Directions, with a description of the complaint, accompany each package, which consists of two boxes, one containing an Ointment, and the other an Electuary.—Price \$1 for both articles, or 50 cents where but one is wanted.

Price \$1 a bottle, or 6 bottles for \$5.
